TECHNICAL EXPERIENCE

Vroozi

Front End Developer

October 2015 - February 2017

Procurement Platform and Solution for seamless purchasing with spend management, suppliers, compliance, process, catalog, efficiency on any device

- Developed key features and minor enhancements for the company's primary product, Purchasing Manager, using AngularJS 1.5 consuming private APIs and JSON data
- Wrote and implemented all necessary functions in NodeJS/ExpressJS to consume new APIs designed for new features
- CRUD operations on development environment MongoDB instances, coercing data to produce desired front-end results
- Wrote test specs for each new method, controller, and service using Jasmine and Karma
- Researched and recommended fixes for issues on the company's secondary product, SmartOCI
- Agile development environment including daily scrum stand-up and regular sprints
- Technologies used: AngularJS, NodeJS, ES6 features, MongoDB, Jasmine, Karma, Gulp, Git/Github

National Western Life Insurance

Software Developer I

September 2013 - February 2015

Underwriter of individual whole and term life insurance policies, and annuities. Chartered in Colorado in 1956 and licensed in forty-nine states and the District of Columbia.

- Responsible for frequent HTML/CSS changes to five external company web sites upon request by internal departments
- Managed SQL database of state-approved policy forms and applications for 20 products using Microsoft SQL Server
- Performed annual updates to the company's conference registration website
- Developed and administered XLNT scripts for ActiveBatch job automation
- Track down and squash bugs in 2.5GB C# code base using Visual Studio 2013
- Successfully juggled the many roles and technologies required for each aspect of the job.
- Technologies used: HTML, CSS, Microsoft SQL Server, SQL Query, ActiveBatch, Project Insight

MakerSquare

Fellow

June 2015 - September 2015

- Lead daily toy problem solution lectures
- Conduct weekly interviews of potential students
- Assist junior students with bugs and issues during all two-day sprints
- Consult with senior students on their group thesis projects
- Technologies used: Javascript, AngularJS, Google Docs

NON-TECHNICAL EXPERIENCE

National Western Life Insurance

Contract Compliance Analyst

January 2001 - September 2013

- Manager of Contract Compliance section for three years

MakerSquare Software Engineering Immersive - Austin, Texas - March 2015 - May 2015 - *Program completion*

Texas State University - *Bachelor of Science in progress, Computer Science major, Physics minor*

U.S. Army Signal Corps - **Graduated with honors May 1998** - *74B MOS: Computer Information Systems Operator Maintainer*

PERSONAL

Enthusiastic software engineer loving the rolling tide of new technologies and frameworks. Genuinely enjoy collaborating with other passionate, talented developers.

Hosted a Python meetup in Sherman Oaks, member of Women Who Code.

I once elbow-checked Scottie Pippen for blocking access to the Chicago Hilton lobby rest room.
